17 July 2019

### **Introduction**

- the condensed consolidated statement of financial position as at 30 June 2019;

- the condensed consolidated statement of comprehensive income for the three-month and six-month period ended 30 June 2019;
- the condensed consolidated statement of changes in equity for the six-month period ended 30 June 2019;
- the condensed consolidated statement of cash flows for the six-month period ended 30 June 2019; and
- notes to the condensed consolidated interim financial information.

The Board of Directors of the Company is responsible for the preparation and presentation of this condensed consolidated interim financial information in accordance with IAS 34, 'Interim Financial Reporting'. Our responsibility is to express a conclusion on this condensed consolidated interim financial information based on our review.

### **Scope of Review**

We conducted our review in accordance with the International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### **Conclusion**

Based on our review, nothing has come to our attention that causes us to believe that the accompanying 30 June 2019 condensed consolidated interim financial information is not prepared, in all material respects, in accordance with IAS 34, 'Interim Financial Reporting'

**(a) Statement of compliance**

The condensed consolidated interim financial information has been prepared in accordance with International Accounting Standard 34 (IAS), Interim Financial Reporting, which permits the condensed consolidated interim financial information to be in summarised form. The condensed consolidated interim financial information does not include all of the information required for full annual financial statements and should be read in conjunction with the audited consolidated financial statements of the Group for the year ended 31 December 2018, except for the effects of adoption of IFRS 16 as described in Note 4 to this condensed interim financial information. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Group's financial position and performance since the last annual financial statements as at and for the year ended 31 December 2018.

The condensed consolidated interim financial information is reviewed, not audited. The comparatives for the condensed consolidated statement of financial position have been extracted from the Group's audited consolidated financial statements for the year ended 31 December 2018 and the comparatives for the condensed consolidated statement of profit or loss, comprehensive income, changes in equity and cash flows have been extracted from the reviewed condensed consolidated interim financial information for the six-month period ended 30 June 2018.

**(b) Judgements and estimates**

Preparing the condensed consolidated interim financial information requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

In preparing the condensed consolidated interim financial information, significant judgments made by the management in applying the Group's accounting policies and key source of estimation of uncertainty were the same as those applied to the audited consolidated financial statements as at and for the year ended 31 December 2018, except for the changes arising on adoption of IFRS 16.

**NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL INFORMATION**  
**for the six months ended 30 June 2019**  
**Bahraini Dinars****3. SIGNIFICANT ACCOUNTING POLICIES**

Except as described below, the accounting policies applied in this condensed consolidated interim financial information are the same as those applied in the Group's audited consolidated financial statements as at and for the year ended 31 December 2018. The changes in accounting policies will also be reflected in the Group's consolidated financial statements as at and for the year ending 31 December 2019.

**4. CHANGE IN ACCOUNTING POLICIES****(a) Adoption of IFRS 16**

The Group applied IFRS 16 with a date of initial application of 1 January 2019. As a result, the Group has changed its accounting policy for lease contracts as detailed below.

IFRS 16 introduced a single, on-balance sheet accounting model for lessees. As a result, the Group, as a lessee, has recognised right-of-use assets representing its rights to use the underlying assets and lease liabilities representing its obligation to make lease payments. Lessor accounting remains similar to previous accounting policies.

The Group applied IFRS 16 using the modified retrospective approach, under which the cumulative effect of initial application is recognised in retained earnings at 1 January 2019. Accordingly, the comparative information presented for 2018 has not been restated – ie. It is presented, as previously reported, under IAS 17 and related interpretations. The details of the changes in accounting policies are disclosed below.

**I. Definition of a lease**

Previously, the Group determined at contract inception whether an arrangement is or contains a lease under IFRIC 4. Under IFRS 16, the Group assesses whether a contract is or contains a lease based on the new definition of a lease.

Under IFRS 16, a contract is, or contains, a lease if the contract conveys a right to control the use of an identified asset for a period of time in exchange for consideration

On transition to IFRS 16, the Group elected to apply the practical expedient to grandfather the assessment of which transactions are leases. It applied IFRS 16 only to contracts that were previously identified as leases. Contracts that were not identified as leases under IAS 17 and IFRIC 4 were not reassessed for whether there is a lease. Therefore, the definition of a lease under IFRS 16 was applied only to contracts entered into or changed on or after 1 January 2019.

**II. As a lessee**

As a lessee, the Group previously classified leases as operating or finance leases based on its assessment of whether the lease transferred significantly all of the risks and rewards incidental to ownership of the underlying asset to the Group. Under IFRS 16, the Group recognises right-of-use assets and lease liabilities for most leases – i.e. these leases are on-balance sheet.

The Group has elected not to recognise right-of-use assets and lease liability for some leases of low value assets and to some short term leases. For leases of other assets, which were classified as operating under IAS 17, the Group recognised right-of-use assets and lease liabilities.

**NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL INFORMATION****for the six months ended 30 June 2019****Bahraini Dinars****4. CHANGE IN ACCOUNTING POLICIES (continued)****Significant accounting policies**

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, and subsequently at cost less any accumulated depreciation and impairment losses, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

The Group has applied judgement to determine the lease term for some lease contracts in which it is a lessee that include renewal options. The assessment of whether the Group is reasonably certain to exercise such options impacts the lease term, which significantly affects the amount of lease liabilities and right-of-use assets recognised.

**Leases classified as operating leases under IAS 17**

At transition, lease liabilities were measured at the present value of the remaining lease payments, discounted at the Group's incremental borrowing rate as at 1 January 2019. Right-of-use assets are measured at either:

- their carrying amount as if IFRS 16 had been applied since the commencement date, discounted using the lessee's incremental borrowing rate at the date of initial application; or
- an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments – the Group has applied this approach to all leases.

The Group used the following practical expedients when applying IFRS 16 to leases previously classified as operating leases under IAS 17.

- Applied the exemption not to recognise right-of-use assets and liabilities for leases with less than 12 months of lease term.
- Excluded initial direct costs from measuring the right-of-use asset at the date of initial application.
- Used hindsight when determining the lease term if the contract contains options to extend or terminate the lease.

**III. As a lessor**

The accounting policies applicable to the Group as a lessor are not different from those under IAS 17.

The Group is not required to make any adjustments on transition to IFRS 16 for leases in which it acts as a lessor. However, the Group has applied IFRS 15 Revenue from Contracts with Customers to allocate consideration in the contract to each lease and non-lease component.

**(b) Impact of adopting IFRS 16**

On transition to IFRS 16, the Group recognised BD 140,398 of right-of-use assets in property and equipment and BD 140,398 of lease liabilities in accrued expenses and other payables.

**NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL INFORMATION****for the six months ended 30 June 2019****Bahraini Dinars****5. SEASONALITY**

Due to the nature of Hotel operations, October to April is usually a busy season. Accordingly, the interim financial results may not represent a proportionate share of the annual results.

**6. PROPERTY AND EQUIPMENT**

During the six-month period ended 30 June 2019, the Group incurred capital expenditure amounting to BD 1,122,213 (30 June 2018: BD 8,693,940) on its various projects.

**7. EQUITY ACCOUNTED INVESTEES**

The Group has a 28.06% interest in Bahrain Family Leisure Company B.S.C. (BFLC), a company registered in the Kingdom of Bahrain and listed on Bahrain Bourse BFLC is primarily involved in operating restaurants, providing services related to family entertainment, supply of amusement related equipment and investing in businesses with similar objectives to those of BFLC.

**11. FAIR VALUES**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal, or in its absence, the most advantageous market to which the Group has access at that date. The fair value of a liability reflects its non-performance risk.

Underlying the definition of fair value is a presumption that an enterprise is a going concern without any intention or need to liquidate, curtail materially the scale of its operations or undertake a transaction on adverse terms.

***Fair value hierarchy***

The Group measures fair values of financial instruments using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements.

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Valuation techniques based on observable inputs, either directly (i.e. ask prices) or indirectly (i.e. derived from prices). This category includes instruments valued using quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly observable from market data.

Level 3: Valuation techniques using significant unobservable inputs. This category includes instruments where the valuation technique includes inputs not based on market observable data
